Hello Mr. Muhammadali:

A couple of weeks ago Ms. Elizabeth Cumberland contacted the Regional office to express her concerns with the health of the residents near the Kingsville Dome mining site, and more specifically those residing near Production Area No. 3. She made some comments about excursions that have taken place at PA-3 because bleeding operations had been halted during the period when mining operations had been suspended. When I asked her about information that might support her claim, she mentioned a report that she said you prepared, which makes reference to the halting of bleeding operations at PA-3.

We will need your help in documenting what may have happened at PA-3 in connection with the bleeding operations following the suspension of mining operations, so that we can evaluate Ms. Cumberland's claims. If you can identify the report(s) that Ms. Cumberland alludes to and would share this information with us, we would appreciate it. Please let me know what you find out. Thanks in advance for your support and cooperation. Sincerely,

José Eduardo Torres - 6WQ-SG
EPA Region 6
